Jash Mitesh Dalal

(240) 243-8420 | dalal.jash@gmail.com | linkedin.com/in/jmdalal | github.com/jashdalal

Education

University of Massachusetts Amherst Aug 2023 – May 2025
Masters of Science | Computer Science GPA : 3.86/4

College of Engineering Pune Aug 2017 – Jun 2021
Bachelors of Technology | Information Technology GPA : 3.53/4

Technical Skills

Languages: C, C++, Java, Python, HTML, CSS, SQL, JavaScript, TypeScript, Golang
Databases: PostgreSQL, MongoDB, MS SQL, Oracle DB, IBM DB2, Redis, Cassandra
Cloud: Docker, Kubernetes, Kafka, AWS (EC2, S3, Lambda), Azure (Functions, AKS), GCP (Compute, GKE)
Misc: Git, Angular, React, Node.js, Spring Boot, Django, Maven, JUnit, Selenium, Agile, Postman, Jira

Experience

PTC Jun 2025 – Present
Software Engineer | Onshape Boston, MA

- Implemented keep-in and keep-out controls in Generative Design using C++, Java, and TypeScript, enabling users to lock critical geometry and exclude no-go areas, cutting redesign cycles and reducing time-to-final-part by **75 minutes** per part.
- Built a Java streaming-results API for thickness analysis and integrated the endpoint into automated health checks executed every **5 min**, helping prevent outages for **2M+** users.

U.S. News and World Report Jun 2024 – Dec 2024
Software Developer Intern | Money team Washington, D.C.

- Developed a Python microservice to transform credit groups into search filters for a React UI, facilitating personalized credit card selection and driving **9,000+** customer visits per month.
- Revamped PostgreSQL database schemas via an SQLAlchemy ORM to integrate brand names for **775** credit cards.
- Crafted CI/CD pipelines in Jenkins to automate production deployments, enabling **50+** error-free releases monthly.

SLB (formerly Schlumberger) Jul 2021 – Aug 2023
Full Stack Software Developer | Data Workspace Pune, India

- Built a Java and Angular platform to consolidate multi-source data into standardized records for over **70** products, eliminating manual processes and driving **$600K** revenue growth.
- Designed a contributor role in Spring Boot microservices, empowering users to perform CRUD operations without owner privileges, achieving a **62%** rise in document ingestion.
- Mentored junior developers in implementing view-only access of geological data in Java, participated in **35+** code reviews and encouraged test-driven development with JUnit and Selenium.

Veritas Technologies LLC Jan 2021 – Jun 2021
Software Engineering Intern | Biztools team Pune, India

- Engineered a Python and Perl database migration framework to move data from **48+** Oracle DB clusters to PostgreSQL.
- Modernized a legacy PHP backend by revamping **1,500+** Oracle queries to run on PostgreSQL, eliminating Oracle licensing and saving **$50K+** annually.

Standard Chartered Bank May 2020 – Jul 2020
Software Engineering Intern | Digital Payments team Chennai, India

- Created a rule-based Django engine generating SQL queries on-the-fly in PostgreSQL and IBM DB2, streamlining tasks for data modelers and saving **2 hours/day**.
- Launched a tracking system for SQL script deployment across **20+** global databases segmented by **5** geographic regions.

Publications

- Hajarnis, **Dalal** *et al.*, *A Comprehensive Solution for Obfuscation Detection and Removal* SMARTGEN 2021
- **Dalal** *et al.*, *Implementation of Universal Solar Charger for EV Applications Using a Cascaded Buck–Boost Converter* I2CT 2021

Projects

News Nugget Jan 2024 – May 2024

- Created a news summarization platform with Google's Flan-T5 model, reducing average reading time by **4 minutes** per article and boosting user engagement by **83%**.
- Leveraged Apache Spark, Docker and MongoDB for real-time parallel processing and storage of news article summaries, ensuring rapid delivery of news articles within **17 seconds** of publication.
